PROFESSIONAL SUMMARY

Computer Science undergraduate and software engineering candidate with ongoing industry experience across backend automation, SQL-driven data workflows, and applied AI systems. Previously worked on healthcare data pipelines involving 2M+ patient records; currently contributing to a team-built stock-intelligence agent for monthly, quarterly, and yearly forecasting with backtesting support. Built full-stack applications spanning REST APIs, authentication, database-backed workflows, and browser-based ML inference; strong problem-solving foundation with 1,000+ algorithmic problems solved across competitive programming platforms.

EDUCATION

CMR Institute of Technology | B.Tech in Computer Science Engineering

Sep 2023 - Jul 2027

CGPA: 8.19/10

Ships Junior College | Telangana State Board of Intermediate Education, MPC

Jun 2021 - May 2023

Marks: 986/1000

Saraswathi Vidya Nikethan High School | Secondary School Certificate

Mar 2021

CGPA: 10.0/10.0

TECHNICAL SKILLS

Programming: Python, C++, Java, JavaScript, SQL

Backend & Databases: Node.js, Express.js, FastAPI, REST APIs, MySQL, MongoDB, Firebase

Frontend & AI/ML: React, HTML, CSS, Bootstrap, TensorFlow.js, COCO-SSD, OpenCV, TensorFlow

Computer Science: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks

Developer Tools: Git, GitHub, VS Code, Docker (Basics)

INTERNSHIP EXPERIENCE

Intern Analyst | Flex Data (Remote)

Aug 2025 - Present

- Built Python automation scripts and optimized SQL workflows for healthcare data-processing pipelines involving 2M+ patient records, improving repeatability and reducing manual processing effort.
- Designed reusable data preparation, validation, and preprocessing steps to improve dataset quality before downstream AI/ML training and inference workflows.
- Translated operational requirements into backend modules, data transformations, and LLM-enabled automation support for internal workflow improvements.
- Debugged reliability and performance issues in existing modules, applying algorithmic reasoning to improve execution efficiency, maintainability, and scalability.
- Currently collaborating with a team on an AI-powered stock-intelligence agent using Kaggle market data, Python, Pandas, Streamlit, and backtesting to evaluate monthly, quarterly, and yearly stock-outcome forecasts.

PROJECTS

ProctoAI - AI-Powered Online Examination Platform

React, Node.js, Express.js, MongoDB, TensorFlow.js

- Developed a MERN-style online examination platform with authentication, exam creation, question management, timed assessments, grading, result review, and teacher-facing proctoring logs.
- Integrated TensorFlow.js and COCO-SSD with webcam streams to detect absent or multiple candidates, mobile phones, books, and prohibited objects at 1.5-second intervals.

Cruise Ship Management System

React, JavaScript, Firebase, Tailwind CSS

- Built a responsive cruise-services application with user onboarding, service discovery, checkout flows, Firebase authentication, and dashboards for six operational roles.
- Organized reusable React components and context-based state management for catering, fitness, movies, salon, party-hall, stationery, and account workflows.

ACHIEVEMENTS

- Secured Telangana State Rank 5 and Rank 9 in first- and second-year Intermediate Board examinations, respectively, with 986/1000 marks.
- Recognized among the top performers in the Smart Interviews training batch for two consecutive years.

COMPETITIVE PROGRAMMING

- Solved 1,000+ Data Structures and Algorithms problems across LeetCode, CodeChef, Codeforces, Smart Interviews, and other competitive programming platforms.
- LeetCode: 572 accepted problems, maximum contest rating 1757 | CodeChef: maximum rating 1595 | Codeforces: maximum rating 1193 | Smart Interviews: global rank 464 and 2nd in college batch.
