PROFESSIONAL SUMMARY

Computer Science undergraduate with hands-on experience in Python automation, SQL data workflows, and AI/ML pipelines processing 2M+ healthcare records. Built full-stack and applied-AI systems while solving 1,000+ algorithmic problems across competitive programming platforms. Focused on building reliable backend systems, practical AI solutions, and scalable software that delivers measurable real-world value.

EDUCATION

CMR Institute of Technology | B.Tech in Computer Science Engineering

Sep 2023 - Jul 2027

CGPA: 8.19/10

Ships Junior College | Telangana State Board of Intermediate Education, MPC

Jun 2021 - May 2023

Marks: 986/1000

Saraswathi Vidya Nikethan High School | Secondary School Certificate

Mar 2021

CGPA: 10.0/10.0

TECHNICAL SKILLS

Programming: Python, C++, Java, JavaScript, SQL

Backend & Databases: Node.js, FastAPI, REST APIs, MySQL

Frontend & AI/ML: React, HTML, CSS, Bootstrap, TensorFlow.js, OpenCV, TensorFlow

Computer Science: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks

Developer Tools: Git, GitHub, VS Code, Docker (Basics)

INTERNSHIP EXPERIENCE

Intern Analyst | Flex Data (Remote)

Sep 2025 - Present

- Built Python automation and optimized SQL workflows for healthcare data pipelines processing 2M+ patient records, improving repeatability and reducing manual effort.
- Designed reusable data-preparation, validation, and preprocessing workflows to improve dataset quality for AI/ML training and inference.
- Translated operational requirements into backend modules, data transformations, and LLM-enabled automation for internal workflows.
- Collaborating on an AI-powered stock-intelligence agent using Python, Pandas, Streamlit, Kaggle market data, and backtesting for monthly, quarterly, and yearly forecasts.

PROJECTS

ProctoAI | AI Examination Platform

React, Node.js, TensorFlow.js, OpenCV

- Developed a full-stack examination platform with authentication, exam creation, timed assessments, grading, result review, and teacher-facing proctoring logs.
- Integrated TensorFlow.js with webcam streams to flag absent or multiple candidates and prohibited objects at 1.5-second intervals.
- Implemented structured exam and proctoring-event workflows with unique exam identifiers and persisted incident counts for efficient teacher review.

Cruise Ship Management System

React, JavaScript, Tailwind CSS

- Built a responsive cruise-services application with onboarding, service discovery, checkout, secure role-based access, and dashboards for six operational roles.
- Developed reusable React components and context-based state for catering, fitness, movies, salon, party-hall, stationery, and account workflows.

ACHIEVEMENTS

- Secured Telangana State Rank 5 and Rank 9 in first- and second-year Intermediate Board examinations, respectively, with 986/1000 marks.
- Recognized among the top performers in the Smart Interviews training batch for two consecutive years.

COMPETITIVE PROGRAMMING

- Solved 1,000+ Data Structures and Algorithms problems across LeetCode, CodeChef, Codeforces, Smart Interviews, and other competitive programming platforms.
- LeetCode: 572 accepted problems, maximum contest rating 1757 | CodeChef: maximum rating 1595 | Codeforces: maximum rating 1193 | Smart Interviews: ranked among the global top 600 and 2nd in college batch.
